CAREER PROFILE

Expert in designing and optimizing business process solutions with Nintex Automations, Microsoft PowerPlatform, and other automation tools, I transform complex workflows into intuitive, efficient systems. Skilled in process mapping, custom UI design, and CSS/front-end development, I deliver user-centric applications that enhance productivity and operational excellence. With a proven track record across industries, I prioritize meticulous documentation, risk management, and visually appealing solutions to drive organizational success.

WORK EXPERIENCE

Advanced Cloud Partners, USA - *Automation Developer*

FEB 2024 - PRESENT

- Streamlined business processes through process mapping and automation, enhancing efficiency and productivity for multiple clients across diverse industries.
- Developed and customized business processes using n8n, Make.com, Power Automate, Zenphi, and other platforms, incorporating custom nodes and user-friendly interfaces to enhance workflow adoption and improve user experience.
- Redesigned and optimized existing Power Automate flows, integrating them with K2 solutions to consolidate disparate automation processes into cohesive, scalable systems.
- Utilized open-source automation tools alongside MS/Google platform capabilities to deliver tailored, high-value automation solutions aligned with client needs.
- Documented technical specifications, process requirements, and UI design decisions to ensure maintainability and support future enhancements.

SakalGb Solutions, Nigeria - Ghana - *Solutions Architect / K2 & Frontend Developer*

MARCH 2022 - PRESENT

- Built User-friendly interfaces for business processes.
- Redesigned K2 custom Themes into modern interfaces using CSS and Javascript.
- Streamlined business processes through process mapping and automation, improving overall efficiency and productivity.
- Collaborated with cross-functional teams to identify areas for improvement and develop solutions.
- Automated various processes using K2, including **LASG E-Planning Permit, Account Opening, Foreign Operations Portal, Project Management, Employee Onboarding and Offboarding.**
- Maintained detailed documentation of business process requirements, product value optimization, and risk management.
- Conducted training sessions to educate interns on business processes and technologies.
- Provided technical support to clients and resolved issues promptly.

Noirak Technologies, Nigeria - *Lead Engineer / Frontend Developer*

FEB 2023 - FEB 2025

- Built responsive and user-friendly websites, ensuring optimal performance and functionality.
- Worked closely with designers and project managers to ensure timely delivery of projects.
- Conducted quality assurance testing and resolved issues before launch.
- Collaborated with back-end developers to integrate front-end features with back-end functionality.

Hidea Africa (Startup), Nigeria - Frontend Developer

OCT 2020 - MARCH 2022

- Implement designs ensuring optimization for maximum speed and scalability.
- Utilize a variety of languages to implement web pages.
- Collaborate in teams alongside backend devs and designers to ensure all elements of web creation are consistent.

SOFT SKILLS

- Dedicated and Innovative Frontend Developer
- Practice Test-Driven Development
- Writes Clean, Maintainable, and Scalable Code
- Good Analytical and Problem-Solving Skills
- SQL server data management
- Workflow design and optimization
- Fast Learner and Attention to Detail
- Time Management and Prioritization
